

# STRATIFICATION

• Stratification

egalitarian

- Hunter-gatherer societies stratified  
gender resources

# HISTORY OF **STRATIFICATION** IN HUMAN HISTORY

- **Stratification** in human societies is nothing new.
- Small, foraging communities tended to be quite **egalitarian**.
- **Hunter-gatherer societies stratified** according to **gender** rather than **resources**, as men and women divided labor between the hunting and tending the home, their physical separation (in terms of place and types of work) exacerbated the differences between their roles.
