CULTURAL DIMENSIONS OF BOUNDARIES

- There are "**cross-cultural differences** in how symbolic boundaries are **linked to social boundaries**" (E.g., how social class is linked to high culture in Europe versus other markers in the U.S. like diet).
- Symbolic boundaries may become **so salient** that they take the place of **social boundaries** (E.g., how symbolic boundaries became more intense in post-reunification East and West Germany after physical and political boundaries collapsed).

SOCIAL AND COLLECTIVE IDENTITY
