

RECALL THAT THERE ARE **THREE** FORMS OF MACHINE LEARNING ALGORITHMS:

Supervised

Learning
known
patterns

Unsupervised

Learning
unknown
patterns

Reinforcement

Generating data
Learning patterns

Watch the video on **artificial neural networks** on the next slide.

This video provides a **conceptual** overview for how **ANNs** work.

In short, **ANNs** take in lots of variables and try to identify which combination of variables best predicts some outcome.
