Cold War

● realist theories

REALISM

- **Realist** thought dominated international relations during the Cold War and “depict[ed] international affairs as a struggle for power among self-interested states.”
- Given the antagonistic nature of the defining **U.S.-Soviet** relationship during the **Cold War**, it makes sense that realism would be the prevailing theory.
- Post-Cold War, **realist theories** have tended to focus on the potential for conflict posed by ethnic divisions, in which neighboring states seek power over each other by eliminating minority groups — as in the former Yugoslavia and the Balkans in the 90s.

REALISM
