

BY THE END OF THIS SESSION YOU SHOULD BE ABLE TO:

- Conceptual:
 - Identify and define at least two types of database schema.
 - Explain the popularity of RDMSs in terms of their advantages.
 - Explain the difference between relational and non-relational/NoSQL database schemes in terms of structured and non-structured data.
- Coding:
 - Identify what each line of provided SQL code is doing in some simple query (e.g., Select, From, Where, And, Join, etc.).
