OBJECTIVE AND SUBJECTIVE MEANING

- Consider people-watching in New York City.
- You can watch someone sitting on a park bench knitting, and you can assume what their **intentions** are **based on what your goal would be** if you had knitting needles in your hand and a ball of yarn.
- Or, you could remember that time you tried to knit and ended up with an overpriced ball of yarn in knots.
- Both times, you're effectively placing yourself in the role of the other person

SIGNIFICATIVE AND EXPRESSIVE
